J.C.M.S.T. helps its students to discover the new experience in a dynamic and supportive environment and it also equip them to handle threats opportunities to envolving and in producing quality, man power, equipped with human and social value required to integrate excellent technical skill social character, leadership, Creativity & innovation for the benefit of mankind & sustainable development of India and to promote in the disciplines.

About the Seminar

The higher education system in India has grown in a remarkable way to become one of the largest systems of its kind in the world. However, the system still have many issues of concern like financing and management of higher education; access, equity & relevance of professional education; assessment & accreditation of institutions; and reorientation of professional programmes having greater emphasis on health consciousness of youths, ethics, values, and quality of professional higher education. Moreover in the rapidly changing scenarios, these issues and challenges in Indian higher education are no longer only nation centric. They have already attained the global dimensions. Therefore, the country needs to rise to the occasion urgently and should reorient its professional higher education system to be vibrant, competitive, meaningful and purposeful. Professional higher education is provided in all kinds of institutions under the broad spectrum of academic, professional and vocational education. In the same way it can be offered in several modes of learning such as classroom learning, distance learning, blended learning as well as non-formal learning.

In the recent past, there have been extensive, prolonged and diverse national discussions at various platforms about enhancement of quality in professional higher education in India. Taking the efforts to the next level the present seminar, entitled 'Professional Higher Education in India: Issues, Innovations and Quality Concerns', envisions of bringing the key education stakeholders together with the understanding that now is the time to move from talks to action. The seminar will progress through a series of carefully crafted technical sessions eventually leading to the development of a new vision for professional higher education. This seminar will certainly work to frame a set of policy recommendations at the institutional, state, and national levels that would facilitate the redefinition of professional & higher education in our rapidly changing technology and knowledge based global society.
